To Whom It May Concern:

RE: Perrin Enterprises

Pizzagalli Construction Company has contracted with Perrin Enterprises to place and finish the concrete base slabs and structural slabs at the Corbalis Stage III Water Treatment Expansions Project. Perrin Enterprises' scope of work includes the placement of over 12,000 cubic yards of base slab concrete, 11,000 cubic yards of structural slab concrete, and 350,000 square feet of trowel finish. The total value of the Subcontract is anticipated to exceed \$250,000.

Perrin Enterprises started working on site in August of this year. To date, they have placed approximately 600 cubic yards of base slab concrete. All concrete placed to date has met Pizzagalli Construction Company's, Camp Dresser & McKee's, and Fairfax County Water Authority's quality standards. In addition, they continue to be responsive to Pizzagalli's scheduling needs.

Do not hesitate to contact me directly at 703-430-8448, extension 23, should you require additional information in this regard.

Sincerely,
