Re: 16047 WXO – FFWR Fullerton Finished Water Reservoir

Letter of Recommendation

Mr. Perrin,

I would like to take the time to thank you for your ongoing work on the Fullerton Finished Water Reservoir Project. Your project scope includes the concrete placement and finishing of (59) wall panels, (91) baffle walls, and eight (8) 18,000 square foot roof sections associated with the Middle and East Tanks.

Your firm has demonstrated hard work, dedication, and professionalism throughout the course of the project. You have completed your scope of work thus far on time and with a sense of urgency.

I would certainly recommend your firm for more work with Preload and am happy to provide any recommendations should you require any in the future.

Please call should you have any questions.

Best regards,

Robert V. Barbarisi Jr.

Robert V. Barbarisi, Jr.
Area Manager
